

DESCRIPTION

Non-medicated product.

NS KAP is made up of microscopic freshwater algae fossils, it is mainly used as an additive in products intended for animal nutrition.

- High purity product treated under a controlled process of temperature and optimal classification.
- It is used as an anti-caking agent in food processing.
- Can be added to premixes or balanced foods as a vehicle or to improve fluidity.
- Due to its amorphous shape, it has a micro abrasive effect that allows the cleaning of the microvilli of the intestine.
- It has the ability to absorb moisture, so it can be used to control barn humidity (sheds, stables, calving pens, freestalls and others).

USE:

NS KAP is recommended to be used to formulate balanced animal feed mixes.

- Do not exceed 2% of the total dry matter intake.
